# Gustavo Barbosa Lima

**Full Stack Developer · JavaScript · React · React Native · Node.js**

*from design to deploy*

Palmas, TO, Brazil · gustavo@gustavodev.dev · +55 63 99111-4551 · gustavodev.dev
github.com/Gustavo16378 · linkedin.com/in/gustavo-barbosa-lima-341886278

## PROFESSIONAL SUMMARY

Full stack developer working with JavaScript and TypeScript on front-end and mobile (React and React Native) and with Node.js and Java (Spring Boot and Quarkus) on the back-end, responsible for the full delivery cycle: from data modeling to deployment and production maintenance. I have websites and applications live for real clients, with custom domains, CI/CD and a focus on performance. Automated testing, API documentation and sound architecture practices are part of my process. Programming since age 16.

## TECHNICAL STACK

| | |
|---|---|
| **Front-end** | React, TypeScript, JavaScript, Next.js, Tailwind CSS, Vite, HTML5, CSS3 |
| **Mobile** | React Native, Expo, Expo Router, EAS Build |
| **Back-end** | Node.js, Java, Spring Boot, Quarkus, REST APIs, JPA/Hibernate, JWT, RabbitMQ |
| **Databases** | PostgreSQL, MySQL, relational modeling, Flyway |
| **Infra & DevOps** | Docker, Git, CI/CD, Cloudflare, Fly.io, Railway, S3-compatible storage, Linux |
| **Testing & docs** | JUnit, Mockito, JaCoCo, Swagger/OpenAPI, Postman |
| **Practices** | Clean Code, MVC, DDD, OOP, automated testing, Scrum |

## PROFESSIONAL EXPERIENCE

**Full Stack Developer · Gustavo Dev (sole proprietorship)**
May 2026 - Present · Palmas, TO · Own registered business

- Direct client work across accounting, engineering, healthcare and retail: requirements gathering, technical proposals, scheduling and post-delivery support.
- End-to-end development of systems and institutional websites, from design to production, with custom domains, CI/CD and performance optimization.
- Post-delivery support and continuous improvement of delivered applications, keeping them stable in production.

**IT Support Analyst · Platano Solution**
Mar 2026 - Jul 2026 · Palmas, TO · Part-time, alongside development work

- Responsible for the company's IT support: diagnosing and resolving hardware, software and network incidents.
- Handling, triaging and logging support tickets, following each through to resolution and reducing recurring issues.
- Setup and maintenance of Windows and Linux workstations and internal applications.

**Full Stack Developer · DS Web Dev**
Nov 2025 - May 2026 · Remote · Freelance

- Built complete web applications for clients, from requirements gathering to production deployment.
- Implemented React and TypeScript interfaces focused on performance, responsiveness and technical SEO.
- Built REST APIs in Java (Spring Boot and Quarkus) with JWT authentication, RabbitMQ messaging and JPA/Hibernate persistence.
- Deployed and maintained cloud environments, with Git version control and Docker containerization.

## FEATURED PROJECTS

**Scheduling App (mobile)** — React Native · Expo · Quarkus · In progress
Mobile app for scheduling and client management for an image consultant. Quarkus back-end with PostgreSQL and versioned migrations (Flyway) already in place; React Native/Expo app with Expo Router navigation and builds distributed via EAS Build.

**Ecommerce Café** — Java · Quarkus · REST API
E-commerce REST API for a specialty coffee shop, with a product catalog organized by categories, types and stock control, and a mapping layer between entities and API responses.

**Budget API** — Java · Spring Boot · JUnit · Docker
Reliability-focused REST API for budget management: 72 automated tests and 89% code coverage (JUnit, Mockito and JaCoCo). Versioned migrations with Flyway, Swagger documentation and a containerized Docker environment.

**Freelancer Desk** — Quarkus · React · PostgreSQL
Full stack application for freelancers to manage projects and clients, deployed to the cloud with a managed database.

**Notifications API** — Java · Spring Boot · SMTP · RabbitMQ
Email notification microservice with asynchronous processing through a message queue and decoupled integration with other applications.

## EDUCATION & LANGUAGES

**Bachelor's in Information Systems** · State University of Tocantins (UNITINS) · In progress · **Languages:** Portuguese (native), English (technical reading)
